#### Provisioning policy of Hong Kong Branch

Collective Provisions for loan losses are provided in accordance with Hong Kong Monetary Authority Loan Classification and Provisioning Specific Provisions for loan losses are provided as detailed below, pursuant to the internal rules for self-assessment of asset quality and the internal rules for providing provision for credit losses:

- For claims to debtors who are legally bankrupt (due to bankruptcy, special liquidation, suspension of transactions with banks by the rules of clearing houses, etc.) or virtually bankrupt, a provision is provided based on the amount of claims, after the charge-off stated below, net of amounts expected to be collected through the disposal of collateral or execution of guarantees.
- For collateralized or guaranteed claims to debtors who are legally bankrupt or virtually bankrupt, the amount of claims exceeding the estimated value of collateral or guarantees, which is deemed uncollectible, has been charged off.
- For claims to debtors who are likely to become bankrupt for which future cash flows could not be reasonably estimated, a provision is provided for the amount considered to be necessary based on an overall solvency assessment performed for the amount of claims net of amounts expected to be collected through the disposal of collateral or execution of guarantees.

#### Provisions for loss on investment securities

Devaluation reserve for investment securities is computed on the value of non-marketable debt securities, multiplied by respective percentage assigned to different issuer. This percentage is determined according to the internal customer rating

MUFGHK的流動資金風險管理是要滿足 銀行內部指引和香港金融管理局(金管局)所要求的。

#### Liquidity Risk Management

Liquidity Risk is the risk that a financial institution incurs losses due to the lack of funding or being forced to pay unreasonably high interest rates to meet the liquidity shortfall. The risk arises due to the maturities mismatch between the assets and liabilities, especially when the cash outflow before the cash inflow happens.

MUFGHK manages liquidity risk carefully and appropriately in accordance with its "Liquidity Risk Tolerance". "Liquidity Risk Tolerance" is the level of liquidity risk that MUFGHK expects to be exposed to, but will endure, and is defined as the level to avoid liquidity shortfall under idiosyncratic liquidity stress and market-wide liquidity stress (individually and in combination), after taking effective countermeasures.

Asset and Liability Management (ALM) Committee, involving Hong Kong Branch Management, Treasury Department and Risk Management Department, is established to monitor and discuss the operation of assets, liabilities and capital; issues related to operation management, policy and systems concerning funding liquidity risk; as well as the status and management conditions of funding liquidity risk.

The management of liquidity risk should include fund management with a full analysis of cash-flows, and constant monitoring of MUFGHK's balance sheet structure, borrowing limit, collateral management, buffer assets, and cost of maintaining liquidity as well as paying attention to financial market situation, in order to ensure the diversity and availability of funding sources, such as Interbank / Inter Office Borrowing, Deposit taking and CD / Bond issuance, across various maturities. Relevant indicators or control has to be set up.

By enforcing the management of liquidity risk mentioned, MUFGHK should aim to fulfill both the internal guideline and regulatory requirement requested by Hong Kong Monetary Authority (HKMA).

#### Remuneration System

Overview of the Governance Structure

The Remuneration Committee of MUFG Bank, Ltd. Hong Kong Branch (the 'Branch') has been established since December 2010 to formulate the Branch's remuneration system for all locally hired employees, Its main functions are to govern our remuneration system, conduct regular internal compliance monitoring and review on the adequacy and effectiveness of our remuneration policy and ensures that its operations is conducted independently of management, balancing risks and rewards

The Remuneration Committee is set in two tiers and comprised of key management from Hong Kong Branch and Head Office functional departments as well as risk control departments and management staff at Head Office level.

The Remuneration Committee members meet periodically (at least once a year) to review the design and operations of the Branch's remuneration system and practices for local employees. Moreover, Remuneration Committee members would evaluate any practices by which remuneration is paid for potential future revenues, make recommendations regarding the remuneration packages for senior management & key personnel of the Branch and to review the benchmark of local industry practices.

While maintaining consistency with our risk management framework, our remuneration policy rewards performance that contributes to the achievement of long-term strategy, business results as well as the regulatory capital. When formulating the Branch's Remuneration Policy, the Remuneration Committee considers various elements such as the balance between fixed & variable pay, alignment of payouts to the time horizons of risks, performance evaluation & measurement mechanism, legal & regulatory requirements including the applicable Supervisory Policy Manuals and circulars issued by the HKMA, market practices, economic climate, risk factors and the related management approach in the conduct of business and disclosure of clear, comprehensive and timely information about compensation practices.

External consultant has been engaged to review the effectiveness of the governance of our remuneration, our remuneration structure and risk alignment as well as the completeness of our remuneration disclosures.

Employee's variable remuneration is formed by linking fulfillment of the pre-determined Key Performance Indicators (KPIs) and demonstration of competency as measured under the Global Performance Management Framework. The KPIs, consisting of financial and non-financial factors, are set in line with the Bank's long-term goal. Financial KPIs would include but not limited to employees who generate profit, revenue, turnover or transaction volume: diversify recurrent income sources; increase return on assets; reduce credit risk, etc. Whereas non-financial KPIs include but not limited to employees who achieve good performance adhering to risk management policies and compliance with legal & regulatory requirements.

The discretionary bonus for all employees will be aligned with the results of the Branch's overall performance, the business division's performance and individual performance over the assessment period.

The award of discretionary bonus and its amount is entirely at the discretion of the Bank. The size and allocation of discretionary bonus would be based on the consideration of the full range of current and potential risks related to the cost and quantity of capital required to support the risks taken; the cost and quantity of the liquidity risk assumed in the conduct of business and the timing and likelihood of potential future revenues incorporated into current earnings, etc. The award of discretionary bonus to individual employee is made by making reference to their roles, responsibilities and activities that involve the assumption of material risks, including but not limited to credit, market, interest rate, liquidity, operation, reputation, legal and strategic risk.

If the overall bonus payment is not justified by the performance of the Bank or the business objectives are not achieved over the assessment period or when it is necessary to protect the financial soundness of the Bank or it is under unexpected special circumstances, all or part of the discretionary bonus may be withheld or deferred by the Bank. The Bank will take into account the current performance and future economy/ market conditions in the allocation of bonus.

Variable remuneration may be deferred subject to the approval of Remuneration Committee. The proportion to be deferred normally increase in line with the seniority and responsibility of an employee, and the time horizon of risks incurred by the employee's activities

All types of remunerations of the Branch are paid in form of cash and that the Branch does not operate any non-cash variable remuneration.
